Height:	1877 mm

Similar to illustration, technical modifications reserved. Without decoration.

Push-through protection made of electropolished stainless-steel.

The push-through safety device for shelf stands in the form of a stainless steel grid serves to secure the stored goods laterally. The Hupfer push-through safety device for shelf stands is a robust and reliable safety device for maximum safety and efficiency in your warehouse. The cleverly designed construction allows for easy and optional hanging and removal of the stainless steel grid on the shelf stand. The push-through safety device is space-saving and enables the continued efficient use of the storage area. The stainless steel grid is electrolytically polished and particularly durable, low-maintenance, long-lasting, and maintenance-free.
