Technical data

Payload:	100 kg
Weight:	0.7 kg
Width:	65 mm
Depth:	135 mm
Height:	220 mm

The swivel castor is used for attachment to mobile devices. The swivel castor enables the mobility, steerability, and controllability of the devices.

The easy-running swivel castor made of high-quality plastic with stainless steel metal parts is designed for attachment to mobile devices. The Hupfer swivel castor ensures the mobility of mobile equipment. The effortless turning, steering, and positioning of devices using the swivel castors increase efficiency and safety in carrying out tasks in narrow or crowded work areas. The robust swivel castor is equipped with a swivel bearing with a double ball race and allows for easy handling of the devices, even with heavy loads. The wheel body is made of high-quality plastic and the tread is made of thermoplastic rubber. The swivel castor protects surfaces and ensures a flawless environment. The precision ball bearing and thread guard enable smooth and nearly silent mobility. The swivel castor is securely mounted to the device using a round pin, providing stability.

- Swivel bearing with double ball ring enables effortless movement and precise control - Precision bearings and thread protection ensure smooth and nearly silent operation
