Plate dispenser for installation into a worktop, for storing ø 7.5-10.2" (190-260 mm) round plates in one stacking compartment.

Dispenser in robust and hygienic design, made of high-quality stainless steel. Open design for installation from above with shelf frame. Open stacking compartment and one stacking platform in plastic-coated rod design to prevent crockery discolourations. Stacking compartment with three plastic-coated crockery guides, variably adjustable without tools. Consistent output height thanks to manually adjustable stainless steel tension spring system. Easy cleaning of stacking compartment from above and via a cleaning opening in the base plate.

The Hupfer encounter plate dispenser EBR-TE 19-26 has an adjustable guide that protrudes 57 mm above the support frame and which can be fixed in a base plate, and the use of non-rusting stainless steel springs that are easy to insert and remove provides optimal adjustment options for different crockery diameters and loads.
