## Technical data

|                          |   |
|--------------------------|---|
| <b>Capacity:</b>         | Up to 44 parts w/o cover, 52 with cover |
| <b>Payload:</b>          | 60 kg                                   |
| <b>Capacity:</b>         | 600 W                                   |
| <b>Supply voltage:</b>   | AC 220-230 V                            |
| <b>Nominal current:</b>  | 2,6 A                                   |
| <b>Protection class:</b> | Class I                                 |
| <b>Frequency:</b>        | 50 Hz                                   |
| <b>Weight:</b>           | 16 kg                                   |
| <b>Width:</b>            | 470 mm                                  |
| <b>Depth:</b>            | 470 mm                                  |
| <b>Height:</b>           | 823 mm                                  |

Plate dispenser for installation into a worktop, for storing  $\varnothing$  10.6-13.0" (180-330 mm) round plates in a statically heated stacking compartment.

Dispenser in robust and hygienic design, made of high-quality stainless steel. Closed design for installation from above with shelf frame. Open stacking compartment and one stacking platform in plastic-coated rod design to prevent crockery discolourations. Stacking compartment with three plastic-coated crockery guides, variably adjustable without tools. Consistent output height thanks to manually adjustable stainless steel tension spring system. Easy cleaning of stacking compartment from above and via a cleaning opening in the base plate. Reduced temperature losses and heating time thanks to cover hood made of polycarbonate with 3-point locking mechanism. Heating through stainless steel tubular heating element, infinitely variable using thermostat toggle switch on the equipment, with temperature limiter as per VDE. Current supply via a connecting cable set consisting of two connecting cables with earthed plug and equipment plug and an On/Off switch with integrated indicator light as disconnecter.

The Hupfer incounter plate dispenser EBR-TE/H 18-33 has an adjustable guide that protrudes 57 mm above the support frame and which can be fixed in a base plate, and the use of non-rusting stainless steel springs that are easy to insert and remove provides optimal adjustment options for different crockery diameters and loads. The vertical installation of the three heating elements ensures a particularly uniform distribution of heat. The on/off switch can be conveniently integrated into the worktop and requires a cut-out measuring 30 × 22 mm.
