Height:	1727 mm

Similar to illustration, technical modifications reserved. Without decoration.

Push-through protection made of electropolished stainless-steel.

The push-through protection for shelving supports in the form of a stainless steel mesh serves to secure the stored goods laterally. The Hupfer push-through protection for shelving supports is a robust and reliable safety device for maximum safety and efficiency in your warehouse. The cleverly chosen design allows for effortless and optional hanging and removal of the stainless steel mesh from the shelving support. The push-through protection is space-saving and enables efficient use of the storage area. The stainless steel mesh is electrolytically polished and particularly durable, easy to care for, long-lasting, and maintenance-free.
