Technical data

Weight:	34 kg
Width:	1000 mm
Depth:	500 mm
Height:	1800 mm

Similar to illustration, technical modifications reserved. Without decoration.

Modular shelving system as a cabinet module made of anodised aluminium in a hygienic design, for the storage and provision of high-quality luxury food and beverages.

1800 x 500 upright made of special 25 x 25 mm rectangular tubes, connected and stabilised by firmly compressed transverse bars. Polymer top covering caps and height-adjustable screw feet to compensate up to 25 mm on uneven floors as a hygienic closure of the upright. A closed aluminium roof serves as dust protection and as the upper closure of the module. Perforated rear and side panels not only protect from unauthorised access, but also allow air to flow in the food storage area. Two hinged doors on the front with recessed handles and magnetic locks as well as eyelets for a standard padlock allow controlled access to the stored items. Full-surface plexiglass panels allow a perfect overview of the cabinet interior. Perfect stability without additional bracing or wall fixings due to the screwed rear panel. Interior prepared to hold 1000 x 500 shelving units from the Norm 20 range of shelving units. It can be used as a separate cabinet or integrated into a HUPFER® standard shelving system.
