Capacity:	StU-1/2
Weight:	1.532 kg
Width:	600 mm
Depth:	292 mm
Height:	138 mm

Similar to illustration, technical modifications reserved. Without decoration.

Sterile supplies basket for transporting, storing and presenting sterile supplies in soft packaging, also suitable for holding the Hupfer compound sieve.

Basket suitable for washing devices and sterilisation, made from premium electro-polished stainless steel wire. By means of two fold down handles on the lateral side, the baskets can be stacked either one inside the other (when empty, for example during washing and disinfecting) or on top of each other (when filled). Fold down handles serve as a slide rail for particularly ergonomic handling when stacking the baskets. At the same time, the basket stacked on top is prevented from damaging the soft packaging in the basket underneath it as a result of sagging.
