Technical data

Weight:	2 kg
Width:	600 mm
Depth:	292 mm
Height:	150 mm

Similar to illustration, technical modifications reserved. Without decoration.

Sterile goods basket for transport, storage, and provision of sterile goods in soft packaging, also suitable for accommodating the Hupfer composite sieve.

Basket in a washing agent-compatible and sterilisation-capable design made of high-quality, electrolytically polished stainless steel wire. With two side folding handles, the baskets can be stacked either inside each other (when empty, e.g., in the cleaning and disinfection device) or on top of each other (when filled). The folding handles serve as a sliding rail for particularly ergonomic handling when stacking the baskets. At the same time, it prevents the basket stacked on top from sagging and damaging the soft packaging in the basket below.

- **Material:** Polished stainless steel - ensures high durability and corrosion resistance.
- **Surface coating:** Smooth, hygienic surface - facilitates cleaning and promotes the highest hygiene standards.
- **Robust construction:** Stable design - ensures reliability and safety in daily use.
- **Versatile application:** Ideal for catering and medical logistics - supports efficient processes in various industries.
- **Ergonomic design:** User-friendly handling - optimises workflow and increases efficiency.
