The sterilisation basket for 1 item made of stainless steel is stackable either nested or on top of each other, and is used for transporting and storing soft-packaged instruments.

The robust sterilisation basket for 1 unit made of high-quality stainless steel is designed for the secure transport and storage of soft-packaged instruments. The Hupfer sterilisation basket for 1 unit is the space-saving and excellent solution for special safety in the workflow with soft packaging. The construction from stainless steel round material is high-quality and durable. The burr-free design offers special protection for soft-packaged instruments, even in small formats. The special shaping of the sterilisation basket allows for versatile handling and application tailored to specific needs. The foldable, end-integrated handles enable safe stacking of the baskets while maintaining protection for the soft packaging. The unique shape of the lower basket base allows for easy nesting of the empty baskets. The hassle-free nesting and unstacking ensures space and time savings, particularly during the cleaning process of the baskets.

- Stainless steel guarantees high quality and durability
- Special shaping allows versatile handling and application-specific use
- Folding handles enable stacking of the baskets while maintaining protection for the soft packaging
- Special shape of the lower basket sections allows for inter-stacking and hassle-free unstacking
