The sterilisation basket for 1/2 StE made of stainless steel is stackable either nested or on top of each other and is used for the transport and storage of soft-packaged instruments.

The robust sterilisation basket for 1/2 StE made of high-quality stainless steel is designed for the protected transport and storage of soft-packaged instruments. The Hupfer sterilisation basket for 1/2 StE is a space-saving and excellent solution for enhanced safety in the workflow with soft packaging. The construction from stainless steel round material is high-quality and durable. The burr-free design offers special protection for soft-packaged instruments, even in small formats. The unique shape of the sterilisation basket allows for versatile handling and application tailored to specific needs. The foldable, end-integrated handles enable safe stacking of the baskets while maintaining protection for the soft packaging. The special shape of the bottom basket sections allows for easy nesting of the empty baskets. The trouble-free nesting and unstacking ensures savings in space and time, particularly during the cleaning process of the baskets.

- Stainless steel guarantees quality and durability - Special shaping allows for versatile handling and application-specific use
- Folding handles enable stacking of the baskets while maintaining protection for the soft packaging
- The special shape of the lower basket sections allows for nesting and hassle-free unstacking
