Technical data

Payload:	100 kg
Weight:	21 kg
Width:	1050 mm
Depth:	550 mm
Height:	880 mm

Similar to illustration, technical modifications reserved. Without decoration.

The mobile instrument table is used for the provision and storage of surgical instruments during an operation or treatment at the treatment couch.

The mobile instrument table serves for the clear provision and convenient storage of surgical instruments. The Hupfer instrument table is a useful aid in operating rooms, clinics, and medical practices. The welded frame construction made of stainless steel square tubing is torsion-resistant and robust. Two loosely suspended tabletops with a profile edge allow for easy removal and replacement to meet individual requirements. The bent profile edge ensures a secure hold of the instruments. The deep-drawn bending guarantees easy cleaning and perfect hygiene. Four swivel castors enable smooth movement and targeted manoeuvring. An antistatic tyre prevents electrostatic charging and effectively protects highly sensitive equipment from potential voltage discharges.

- Welded construction ensures torsional stiffness and robustness
- Loosely suspended table tops allow for easy replacement to meet individual requirements
- Profile edge ensures secure hold of instruments and uninterrupted treatment process
- Deep-drawn edge allows for easy cleaning and perfect hygiene
- Swivel castors ensure smooth movement and precise manoeuvring
- Total lock guarantees safe movement and securing
- Antistatic tyres prevent electrostatic charging and protect highly sensitive equipment
