The sliding shelf is designed for storage with maximum space utilisation. The shelf is movable on ceiling tracks. Depending on the model, the shelf is suitable for continuous use at ambient temperatures ranging from -40°C to +60°C. The supports serve as the storage surface.

The Hupfer sliding shelf offers a clear and easily accessible storage solution for order in your logistics with maximum space utilisation. The modular and movable design allows for a needs-specific configuration for different conditions and ensures the highest space efficiency. Thanks to the mobility of the shelf via a guide using ceiling tracks and rollers on the shelf uprights, you can create up to 100% more shelf space than with a stationary shelf. The ceiling tracks are screwed to the ceiling. The ceiling guide ensures appropriate ground clearance when cleaning the premises. You can freely choose the individual components of the shelf according to your needs in accordance with our Hupfer standard shelving series. The effortlessly hung supports offer, depending on the series, a secure, well-ventilated, and easy-to-clean surface that can bear high loads. The materials used are sustainable, 100% recyclable, and so valuable that Hupfer already guarantees to buy back your entire shelf at the end of its service life.

- Movable system leads to 100% more shelf space and maximum utilisation of space
- Ceiling guidance ensures greater ground clearance when cleaning the premises
- Supports ensure safe, hygienic storage and unchanged position of the stored goods
- Quality processing of high-quality materials enables easy cleaning and perfect hygiene
- Valuable materials ensure sustainability and value retention
- Stable construction guarantees high stability and load capacity
- Modular system ensures easy handling from assembly to cleaning with minimal effort
