The sliding shelf is used for storage with maximum space utilisation. The shelf is movable on ceiling rails. Depending on the model, the shelf is suitable for continuous use at ambient temperatures from -40°C to +60°C. The supports serve as a surface for placing items.

The Hupfer sliding rack offers a clear and easily accessible storage solution for order in your logistics with maximum space utilisation. The modular and movable design allows for a needs-specific configuration for different conditions and ensures the highest space efficiency. Thanks to the mobility of the rack via a guide using ceiling tracks and wheels on the rack uprights, you can create up to 100% more shelf space than with a static shelf. The ceiling tracks are screwed to the ceiling. The ceiling guide ensures appropriate ground clearance when cleaning the premises. You can freely choose the individual components of the rack according to your needs in line with our Hupfer standard shelving series. The easily hung shelves provide a safe, well-ventilated, and easy-to-clean surface depending on the series and can support high loads. The materials used are sustainable, 100% recyclable, and so valuable that Hupfer guarantees to buy back your entire rack at the end of its service life.

- Movable system leads to 100% more shelf space and maximum space utilisation - Ceiling guidance provides more ground clearance when cleaning the premises - Supports ensure safe, hygienic storage and unchanged position of the stored goods - High-quality processing of premium materials allows for easy cleaning and perfect hygiene - Valuable materials ensure sustainability and value retention - Stable construction guarantees high stability and high load capacity - Modular system ensures easy handling from assembly to cleaning with minimal effort
